REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: After a review of the prior art of record, it is believed that the present invention is novel and non-obvious wherein no reference discloses a pressure-resistant hose having a watertight structure including a hose layer including polyethylene mixed fabrics and at least one watertight film coated on at least one of the inner and outer surfaces, both ends of the hose being overlapped with each other and adhesives coated on both overlapped ends such that minute pores of polyethylene mixed fabrics exposed along both overlapped ends of the hose are covered with adhesives, there preventing dew condensation phenomenon from occurring on exposed ends or surfaces of the pressure-resistant hose., as recited in claim 1. The closes reference U.S. 6,588,456 to the same inventor discloses overlapped ends being bonded together from the application of a bonding material between the two ends, but does not disclose adhesive covering the ends of both ends and does not disclose the pores of polyethylene mixed fabrics being covered to prevent dew condensation phenomenon. No reference discloses a resin film coated on an inner overlapped end of the hose layer exposed to an inner portion in such a manner as to cover the pores of polyethylene mixed fabrics exposed along both overlapped ends, as recited in claim 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
